

TEMESGEN TAREKEGN

Bahir Dar, Ethiopia | tmsgn1996@gmail.com | +251 953 201 364 | github.com/tmsgn

Final-year Computer Science student at Bahir Dar University and Full-Stack Developer with extensive experience building production-ready web and mobile applications. Specialized in **Next.js**, **Flutter**, **AI Integration (RAG)**, and **Scalable Backend Architectures**. Proven track record of moving projects from initial schema design to deployment in fast-paced environments.

TECHNICAL STACK

Languages: TypeScript, JavaScript, Dart, Python, C++, SQL
Frontend/Mobile: Next.js, Flutter, React Native, Tailwind CSS
Backend/DB: Node.js, Bun Runtime, Prisma ORM, Supabase (PostgreSQL), Sanity CMS
AI/DevOps: Gemini API, Hybrid RAG, Stripe Connect, Git, Vercel

EDUCATION

B.Sc. in Computer Science Expected July 2027
Bahir Dar University, Ethiopia
• Focus: Software Engineering, Data Structures, and AI Implementation.

SELECTED PROJECTS

E-Commerce Application (Web & Mobile)

Flutter, Next.js, Sanity CMS, Prisma, Supabase, Stripe Connect

- Developed a high-performance cross-platform mobile app using **Flutter** alongside a web version in Next.js.
- Engineered a tri-portal architecture with complex payment splits via Stripe and automated AI analytics.

Lasta AI - Intelligent Study Assistant

Flutter, Next.js, Gemini 1.5 Flash, Hybrid RAG

- Built a mobile assistant using **Flutter** providing curriculum-grounded help for Ethiopian students.
- Implemented a Hybrid RAG pipeline to ensure high accuracy while maintaining data efficiency.

EXPERIENCE & LEADERSHIP

Team Lead | Campus Hackathon 2026
• Led a development team through a 48-hour sprint to build a functional prototype of Lasta AI.
• Managed technical architecture, database modeling, and AI integration.

Independent Full-Stack Developer 2025 – Present
• Developed diverse applications including task managers and movie streaming APIs.
• Utilized Agile methodologies for rapid project iteration and delivery.
